

# HEALER

*Medicine and Philosophy ————— seemingly far apart*

*But not when science is elevated to an art  
Ecstasy and pain surrounds us, as we try to heal  
Besieged by forces trying to undermine the zeal*

*Since the very dawn of Man  
The Shaman for the tribe-attempted to understand  
The myth of the Creator, why did it seem so real?*

*Trying to comfort and heal through him  
The awareness-that he brought  
Through history became such power-to be used  
For the better or for destruction*

*Man's choice wise must be  
To see the clear instruction  
Of what "PHYSICIAN" is meant to be  
The healer of the wounded, compassion and suffering  
Always experienced*

*Our mission-only to mollify  
The crying of the sick- for only God can inspire us  
To help prolong this plane of thought  
A visit to this Earth—  
Time in school is valuable*

*So, let folks have some extra work to do  
To prepare themselves for the journey  
Inevitable—divine  
Well tutored to experience————— the end of time.*
