

## In Errata

In the article " Effect of addition of epidural ketamine to steroid in lumbar radiculitis: One – Year Follow-Up," published in Pain Physician journal in September/ October 2011; 14:475- 481

The author would like to make changes to Table 2. These corrections have no effects on results or statistical analysis of the results or value of the data.

Table 2. *Patient characteristics in both groups .*

|   | <b>Group I<br/>N = 86</b> | <b>Group II<br/>N = 88</b> |
|---|---------------------------|----------------------------|
| Age (years) : Mean (SD)                 | 4.2 (13.2)                | 47.8 (9.7)                 |
| Height Cm : Mean (SD)                   | 163(10)                   | 164 (12)                   |
| Weight Kg : Mean (SD)                   | 79 (13)                   | 82 (12)                    |
| Male / Female                           | 47/39                     | 48/40                      |
| Duration of pain (months): Mean (range) | 9 (6 – 19)                | 10 (6- 21 )                |
