

In Errata

In Analgesic Efficacy and Adverse Effects of Meperidine in Managing Postoperative or Labor Pain: A Narrative Review of Randomized Controlled Trials, (Pain Physician 2020; 23:175-201) the authors inadvertently omitted an acknowledgment to Medipaper. This included performing literature search and preparing a preliminary draft under the instruction of the authors. Medipaper also performed medical English writing and editing. This has now been included in the acknowledgment section of the published article.
